

High half selects checkpoints: spatial validation, not an independent test; no guard band. Reference is an experimental estimate.
Dashed contour: scored interior. Prior fragments: Vong et al., Contrast-invariant deep ptychography neural networks, arXiv:2608.02869
(CC BY 4.0), synthetic-only, whole field, cropped and rescaled. TP2 probe/reference-histogram provenance applies only to its
Velociprobe family. Whole-acquisition images include the training region.
